

## Giada NEWS October 2024

Elevate Your Outdoor Systems with Giada's Embedded Solutions

Why choose Giada for Outdoor Deployments?

The advertisement features a central image of a bus stop shelter with a digital display showing the Windows 11 logo. To the left, a blurred street scene is visible with the "Giada" logo overlaid. To the right, a blue panel displays icons for snowflakes and a sun, with a thermometer in the center. Below the icons, the text reads "-20°C" and "60°C", followed by "Wide temperature and voltage range". Below this, a lightning bolt icon is shown between "12 V" and "24 V". In the foreground, three embedded computer modules are shown: IB3-281 (labeled "Coming soon"), AE613 (a rack-mountable unit), and AF208 (labeled "Coming soon").

**FIND IDEAL EMBEDDED SOLUTIONS  
FOR YOUR OUTDOOR SOLUTION**

### Diverse Performance Options

At Giada, we understand that every application is unique. That's why we offer a variety of performance gradients, ensuring that our embedded solutions meet your specific needs without breaking the bank. Whether you're running a digital signage display or a monitoring system, we have the right product for you.

## Giada NEWS October 2024

### **Wide Temperature and Voltage Range**

Our outdoor embedded solutions are engineered to perform in harsh conditions. With a wide operating temperature and voltage range, you can rely on our devices to function effectively, even in extreme environments. This durability is crucial for maintaining system integrity and performance when faced with the elements.

### **24/7 Operation**

Reliability is paramount in outdoor applications. Our embedded solutions are designed for 24/7 operation, ensuring that your systems run continuously without interruption. Whether it's a kiosk in a bustling urban area or a remote monitoring station, Giada's products are built to deliver dependable performance around the clock.

### **Best-selling models**

One of our top-selling models is the AE613. Powered by the Intel Core i series from the 13th generation Raptor Lake, the GIADA AE613 industrial PC is designed to perform in a wide range of temperatures, from -20 to +60 degrees Celsius, making it ideal for outdoor kiosks and vending machines.

The AE613 excels in graphics performance as well. Even in the i3 configuration, it features proven Intel UHD graphics, delivering impressive quality for high-resolution video displays. Digital signage users will appreciate the flicker-free refresh rate of 60 Hz for smooth visuals. For those opting for the i5 or i7 configurations, the AE613 is equipped with the advanced Intel Iris Xe GPU, which supports 4K content across three displays simultaneously.

### Exciting Innovations on the Horizon

We're also thrilled to announce that new models featuring the Intel Processor N150 will soon be available! These upcoming solutions will further enhance our offerings, providing even greater efficiency and performance for outdoor deployments. Stay tuned for more updates as we continue to innovate and expand our product lineup.

### Conclusion

With the pressing need to adapt outdoor systems to meet the challenges of climate change, Giada's embedded solutions provide the reliability, performance, and affordability that customers require. Let us help you elevate your outdoor applications to new heights. For more information about our products and the upcoming models, visit our website or reach out to our team today!
