Elo Pay 22" Tap to Pay Expands Compatibility for Self-Service Kiosks

Fully integrated contactless payment with a 22-inch Android touchscreen and Stripe's Tap to Pay on Android solution enables seamless transactions and enhanced checkout customization.

Launched on August 1st, the all-new Elo Pay 22" touchscreen is a powerful self-service kiosk that allows a wide array of merchants to accept contactless payments with ease. Now, Elo is excited to announce that the touchscreen is compatible with Stripe's Tap to Pay on Android solution and can be set up on each kiosk in minutes for users who have enabled Tap to Pay with Stripe.

Elo Touch NEWS October 2024

Elo Pay 22" Tap to Pay Expands Compatibility for Self-Service Kiosks

The innovative 22" touchscreen has been created to maximize user experience, allowing customers to quickly and easily interact with the self-service kiosk, creating an engaging and efficient encounter with every transaction. Designed to be highly versatile, the all-in-one payment system caters to a wide range of needs, from ordering and ticketing to check-in, making it ideal for use across a broad range of industries. Now, Elo is taking the innovative touchscreen further with compatibility with Stripe's Tap to Pay on Android solution. This will allow merchants to accept contactless payments in-person via American Express, Mastercard, and Visa contactless cards, as well as NFC-based mobile wallets such as Apple Pay, Google Pay, Samsung Pay, and more. This compatibility will allow merchants to create a unified commerce experience across their online and in-person customer interactions. Merchants will also not need to buy, set up, or manage any additional hardware, such as dedicated card readers, to start accepting payments through the Elo Pay 22" touchscreen. Setup takes only a few moments per kiosk, ensuring businesses can benefit from the partnership almost immediately.
